

NLP Course Project

Milestone 1: Pre-Final Delivery — Discussion Rubric | Total: 25 pts

Pre-Final Delivery — Discussion Rubric				
Criterion	Marks	Full marks	Partial marks	Weak / no marks
Section 1 — Implementation: is the system working?				
Working implementation <i>Baseline + advanced model</i>	6	6 — Both working Baseline and advanced model run end-to-end and produce measurable outputs.	3 — One working Only one approach is functional; the other is incomplete or broken.	1 — Not working No runnable system; only code fragments or plans.
Preliminary results & evaluation <i>Metrics + initial analysis</i>	6	6 — Results + insight Metrics reported for both approaches; team can explain patterns and initial errors.	3 — Numbers only Some metrics exist but team cannot explain what the results mean.	1 — No results No metrics produced; team cannot discuss output quality.
Section 2 — Understanding: does the team know what they built?				
Data & preprocessing <i>Cleaning, tokenization, choices</i>	4	4 — Justified Preprocessing is done and team can explain every key decision made.	2 — Done, unclear Data is processed but team cannot justify choices or skipped important steps.	0 — Incomplete Data not properly prepared; key issues left unaddressed.
Team coordination & contribution <i>Roles, equal work</i>	4	4 — All engaged Each member explains their role confidently; work is visibly distributed.	2 — Uneven One or two members dominate; others struggle to explain their contribution.	0 — One person Clearly one person did the work; others cannot discuss the project.
Section 3 — Presentation: can the team communicate their work?				
Presentation quality <i>Clarity, demo, Q&A</i>	5	5 — Clear & confident Work is explained clearly; demo runs; team answers questions accurately and without hesitation.	3 — Adequate Explanation is mostly clear but demo is shaky or team struggles with some questions.	1 — Unclear Team cannot explain key decisions; no demo or unable to answer basic questions.
Total	25 / 25			

Risk flag: Any criterion at the lowest level should be resolved before final submission.

NLP Course Project

Final Delivery — Evaluation Rubric | Total: 70 pts (+5 bonus)

Final Delivery — Evaluation Rubric				
Criterion	Marks	Full marks	Partial marks	Weak / no marks
Section 1 — Report quality (already written; now judged on depth & polish)				
Report quality <i>Writing, structure, figures</i>	25	23–25 — Publication-ready Clear writing throughout; well-structured; figures are informative; all decisions explained with appropriate depth.	15–22 — Adequate Report is readable but has gaps in explanation, weak figures, or structural issues.	0–14 — Poor Report is incomplete, poorly structured, or fails to explain the work.
Section 2 — Results & analysis (depth, not just numbers)				
Evaluation & results <i>Metrics, comparison, clarity</i>	10	9–10 — Complete All metrics reported; clear comparison between baseline and advanced model; results are correctly interpreted.	5–8 — Partial Metrics present but comparison is weak or interpretation is superficial.	0–4 — Missing Metrics are incomplete, or the results are misinterpreted.
Analysis & error understanding <i>Why results happened</i>	10	9–10 — Insightful Team explains why the model succeeded or failed; error analysis with specific examples; draws lessons for improvement.	5–8 — Surface-level Team describes what happened but not why; error analysis is generic.	0–4 — Absent No analysis of results; team cannot explain performance differences.
Section 3 — Problem & idea (motivation and contribution assessed on depth)				
Problem & idea clarity <i>Motivation, novelty, goals</i>	5	5 — Well-motivated Problem is clearly framed; motivation is compelling; goal is realistic and achieved.	3 — Adequate Problem is stated but motivation or contribution is underdeveloped.	0–1 — Weak Problem poorly defined or goal not achieved with no reflection.
Section 4 — Teamwork & presentation (final judgment)				
Task distribution & teamwork <i>Equal contribution, documented roles</i>	10	9–10 — Balanced Every member contributed meaningfully; roles are documented; any individual can speak to the full project.	5–8 — Mostly balanced Contributions are uneven but all members participated.	0–4 — Imbalanced One or two members carried the project; others cannot engage with questions.
Presentation <i>Clarity, demo, Q&A depth</i>	10	9–10 — Polished Confident delivery; smooth demo; team answers questions with technical depth and handles follow-ups well.	5–8 — Competent Presentation is clear but delivery is uneven or answers lack depth.	0–4 — Weak Presentation is disorganized; demo fails or team cannot answer basic questions.
Total	70 / 70 (+ 5 bonus)			

Bonus (5 pts): Any meaningful addition — a hybrid approach, additional comparison, optimization, or novel contribution — earns up to 5 extra points.
